

# Copper Creek

## Driveway Extension – Checklist

*In order for a driveway extension architectural request to be considered reviewable by the Architectural Committee, please be sure each of the boxes below are checked or addressed and to include the fully completed information attached to the architectural application.*

- Only concrete extensions matching the current driveway's color and texture will be accepted.
- Driveway extensions must be located on the side gate portion of the home. Driveway extensions cannot be installed on the front door side of the home.
- A plat map must be provided that includes:
  - The existing/current driveway dimensions
  - The locations and dimensions of the proposed extension
  - The final dimensions of the current driveway + the proposed extension
- The proposed extension must end at least one foot from the side property line. Please make sure that is indicated in the plat map provided.
- The one-foot easement from your neighbor's property line remains as the same granite material currently in your front yard.
- Painting or staining this extended driveway is strictly prohibited.
